Players can wager on either a single number or a range of numbers, on the red or black, or on odd or even. To determine the winning number and color, a croupier spins the Roulette wheel and rolls a ball in the opposite direction.

The ball eventually falls into one of 37 numbered and colored pockets on the wheel (numbers 0 to 36)

GAME RULES:

PLACING A BET

Inside Bets are bets placed on numbers straight up or on a line that separates numbers and comprises a group of numbers.

Outside Bets are any of the bets placed in the external area of the number table.

How to place Inside and Outside Bets:

Choose a chip value

Click on the bet value you wish to place on European Roulette table

Click on Spin

INSIDE AND OUTSIDE BETS

Straight Up: Place a bet on the line between any two numbers.

Street Bet: Place a bet at the end of any row of numbers, covering three numbers.

Corner Bet: Place a bet on the corner where four numbers meet.

Line Bet: Place a bet at the end of two streets on the line dividing them.

A line bet covers all the numbers in either street, for a total of six.

Dozen Bet: Place a bet in one of the boxes marked "1st12", "2nd12", or "3rd12", each of which covers twelve numbers.

Column Bet: On the short side of the roulette table are three boxes marked "2 to 1". By placing a chip in one of these boxes, the player selects all twelve numbers above it (excluding 0).

1-18 / 19-36 (High/Low): A bet placed in one of the boxes marked "1 to 18" or "19 to 36", covers 18 numbers.

Red/Black or Even/Odd: A bet placed in one of the four boxes, on the sides of the board, covers half of the numbers on the board, as described in that box.

The zero is not covered by any of these boxes. Each box covers eighteen numbers.

Trio: a bet on 0, 1 and 2; or 0, 2, and 3. The chip is placed at the intersection of the three desired numbers.

Top line: a bet on 0, 1, 2, and 3. The chip is placed at the corner of 0 and 1.

MALFUNCTION MANAGEMENT

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off. In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player.

INFORMATION TO THE PLAYER

Players have access to game rules from within the game at all times.

GAME SIMULATION

A demo version of the game is available at
