RANDOMIZATION

Random Number Generator (RNG) The algorithm used for random number generation (RNG) is Fortuna, physical random number generator exploiting an elementary quantum optics process. Fortuna has been evaluated and certified by the Trisigma, the recognized Netherlands company in charge of measurement science, testing and compliance. It confirmed that the quality of its random output complies with the highest requirements. See the Certificate of Conformity and read the Test Report on TBD <http://www.idquantique.com/>

MALFUNCTION MANAGEMENT

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off. In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player.

INFORMATION TO THE PLAYER

Players have access to game rules from within the game at all times.
