GAME FEATURES:

3x3 reel board, 5 pay lines, Re-spin, Free Spins Bonus game

BONUS GAME

A Free spin game in which the player collects bonus symbols. The game has 7 levels of prizes, the player starts with the very first level, which corresponds to 3 bonus symbols and already guarantees a prize based on Free Spin game results.

To get a higher prize (moving to another prize level) the player receives 3 Free Spins.

If as a result of 3 Free Spins player did not increase his bonus winnings (no bonus symbols fell out), Free Spins game ends.

If one or more bonus symbols fall on the field during Free Spins the bonus prize level is increased by the number of bonus symbols, and the Free Spins counter is updated to 3 Free Spins.

The game ends:

1. Free Spins are over.
2. The player gets the maximum bonus prize in the Free Spin game.

Max win in Bonus Game = 15540x (20x777)

WILD SYMBOL

If 3 Wild symbols appear on 1 wheel at the same time, these symbols are assigned as "Sticky Wilds" and 1 Re -spin is given. Re-spin spins reels that are not fixed (no 3 x Wild).

Features:

If 3 more Wild symbols appear on one more wheel during Re-spin (the result is that 2 reels have 3 Wild symbols), the two wheels are Locked, and another Re-spin is given.

If during a standard spin 3 Wild symbols on each wheel at the same time on two wheels, then these two wheels are Locked, and 1 Re-spin is given to spin the third wheel.

In any case, if the board has 3 Wild symbols on each of the 3 wheels, then the maximum win on the Pay lines is counted, and no Re-spin is given. This rule works for the base spin as well as if this situation occurred during one or two Re-spins in a row.

Regular Wild symbol can substitute all symbols

GENERAL RULES:

RANDOMIZATION

Random Number Generator (RNG) The algorithm used for random number generation (RNG) is Fortuna, physical random number generator exploiting an elementary quantum optics process. Fortuna has been evaluated and certified by the Trisigma, the recognized Netherlands company in charge of measurement science, testing and compliance. It confirmed that the quality of its random output complies with the highest requirements. See the Certificate of Conformity and read the Test Report on TBD http://www.idquantique.com/

MALFUNCTION MANAGEMENT

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off. In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player.

INFORMATION TO THE PLAYER

Players have access to game rules from within the game at all times.
