RANDOMIZATION

Random Number Generator (RNG) The algorithm used for random

number generation (RNG) is Fortuna, physical random number

generator exploiting an elementary quantum optics process.

Fortuna has been evaluated and certified by the Trisigma,

the recognized Netherlands company in charge of measurement

science, testing and compliance. It confirmed that the quality

of its random output complies with the highest requirements.

See the Certificate of Conformity and read the Test Report on TBD

MALFUNCTION MANAGEMENT

If a player attempts to access a game using an invalidated session,

(for example, due to inactivity or system restart) an error message

is displayed in the game. The player can then log on again and resume

game play. The game state is always stored so the player can resume

game play exactly where he or she left off. In case of an HTTP error,

network timeout or server error a "technical error" message will be

displayed to the player.

INFORMATION TO THE PLAYER

Players have access to game rules from within the game at all times.
